SPRINT PLANNING MEETING – PA3

Date:	December 2nd, 2022
Time:	2pm – 3pm
Location:	Discord
Attendance:	Hoang Huu Minh An Nguyen Vo Minh Tri Nguyen Thi Minh Thao
Absent:	Trinh Duc Thien Nguyen Hoai An

AGENDA

- ❖ **Check-in**
- ❖ **Planning the next sprint**
- ❖ **Training about MVC Model**
- ❖ **Identify and prioritize tasks**
- ❖ **Assign tasks to team member**

PLANNING

❖ **Task for next sprint:**
  - o Revised Use-case Specification.
  - o Define Software Architecture.
    - Draft the software architecture document, filling the required sections in the document using the template provided with this assignment. The document needs to provide and explain key components and the organization of these components to form the architecture. For this PA, the goal is to form an architecture following a certain styles like MVC, n-tier, and microservices.
  - o Class Diagram
    - Model class diagrams for each of the key components defined in the architecture.
    - Class diagrams should include classes, their main attributes, operations and relationships among them. Try to detail the class diagram with all available information you have. You are not required to imagine unrealistic attributes, operations, and relationships that may not be needed in the future. Basically, go as far as you know.

CONCLUSION

Task	Responsible
o Revised Planning Document. o Define Software Architecture. o Research ReactJS, Node/ExpressJS. 　- What is this? 　- How to set up? 　- What are the differences? 　- How does react JS integrates with node js? 　- …	All
